## **Rockwell Collins Selects Rockliffe MailSite?**

### **MailSite is Key Component in HF Messenger Wireless Appliance**

San Jose, Ca, - **January 10, 2001** --- Rockliffe, Inc., a leading developer of messaging infrastructure software for Windows NT/2000, today announced an OEM Agreement with Rockwell Collins. Rockwell Collins has selected Rockliffe MailSite for incorporation into its HF Messenger wireless messaging product. Rockwell Collins selected Rockliffe MailSite for its industry leading performance and unsurpassed reliability.

HF Messenger permits personal computers to exchange any kind of encrypted digital information over HF (high frequency) radio. Typical applications include ship-to-shore and air-to-shore tactical wireless communications for military and airlines worldwide. HF Messenger is based on the protocol defined in the NATO STANAG 5066, an international public standard for HF data communications developed by NC3A NATO agency.

“As communication devices become more mobile, e-mail has become the medium of choice. Rockwell Collins HF Messenger e-mail product is designed to meet the growing worldwide need for secure wireless communication from anywhere to anywhere. The Rockliffe MailSite software provides a rock solid messaging engine for this advanced Rockwell Collins product,” said a source close to the project.

“Rockliffe is pleased to be associated with Rockwell-Collins. Rockliffe's MailSite software will give added strength and reliability to Rockwell-Collins HF Messenger e-mail product,” said John Davies, president and CEO of Rockliffe.

## **About Rockliffe**

From the company's inception, Rockliffe has been committed to leading the market in Internet messaging infrastructure software designed specifically for Windows NT/2000. Rockliffe's flagship product, MailSite, is an integrated messaging platform that includes SMTP, POP, IMAP and LDAP e-mail services, a Web messaging client, a WAP e-mail client and a list server. MailSite also includes state-of-the-art server-level protection against Spam and unauthorized relay. It is remarkably easy to use, and can quickly accommodate additional users with minimal investment in hardware, software, personnel and premises. Rockliffe MailSite's unique scalability provides an affordable long-term messaging solution for companies and organizations of all shapes and sizes, from the smallest partnership to the largest service provider.
