Increased Demand Drives Rockliffe Expansion

Growth in business to business e-mail market requires additional staff and resources

Campbell, CA –July 30, 2001 – Rockliffe, a leading developer of messaging and e-mail infrastructure software for service providers, today announced the opening of new worldwide headquarters in the Pruneyard Tower, one of Silicon Valleys most prestigious office facilities located in Campbell, California.

“Rockliffe’s sales are still growing, despite the downturn that other vendors have experienced in our space,” said John Davies, president and CEO of Rockliffe. “To meet this increased demand from our customers, we moved into this larger facility in Campbell and have added many new employees in the last couple of months. Rockliffe contrasts the current Silicon Valley economy, growing while others shrink.”

Since 1995, Rockliffe has specialized in developing secure, scalable messaging and e-mail software for service providers, portals, enterprises and organizations. Rockliffe’s standards-based messaging software hosted in customer’s’ data-centers reliably delivers e-mail for over 10 million users worldwide. Rockliffe began its existence in founder, John Davies’ spare bedroom; within a year the company had moved to executive offices. With this move to the Pruneyard, Rockliffe has taken the next step in its growth path.

Rockliffe MailSite is a secure, scalable, multi-language, standards-based messaging and e-mail server for Windows 2000 that is easy to brand and offers a comprehensive and flexible range of plug-ins and APIs.

About Rockliffe

Rockliffe is a leading developer of scalable messaging and e-mail infrastructure software for Internet Service Providers, Application Service Providers, and corporations. Rockliffe was established in 1995 and is based in California's Silicon Valley, with international headquarters in Leeds, UK. Rockliffe has several thousand customers worldwide hosting more than 10 million mailboxes. These include leading ISPs such as Digex, unified messaging providers such as Call Sciences, and large enterprises including Intel, AT&T, Cambridge University, and UK government departments.
